

# Picnic Point High School

## Works notification

**2 December 2020**

Dear parents/carers,

As part of geotechnical investigation work to inform planning for the Picnic Point High School upgrade project, suspected asbestos containing material was found in the ground near the sports courts and Block D. The material has been tested and confirmed as bonded asbestos, which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

Safety measures and monitoring have been put in place to ensure there is no risk to students, staff or the local community. As a precaution, the area has been cordoned off and will remain out of bounds to students and staff until remediation is completed.

This area will be remediated in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Remediation works will be undertaken on Thursday 3 December 2020. All asbestos containing material will be removed outside of school hours.

Testing will be completed to ensure the area has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff. We will keep you informed if further material is found which requires removal.

The health, safety, and well-being of the school and the local community is our highest priority. Please be assured that the removal of this material will not pose a risk to the local community.

Thank you for your cooperation during this important work.
